This manual may not, in whole or in part, be copied, photocopied, reproduced, translated or converted to any electronic or machine readable form without prior written consent of Opticon.

Limited Warranty and Disclaimers

PLEASE READ this manual **CAREFULLY** before installing or using the product.

Serial Number

A serial number appears on all Opticon products. This official registration number is directly related to the device purchased. Do not remove the serial number from your Opticon device. Removing the serial number voids the warranty.

Warranty

Unless otherwise agreed in a written contract, all Opticon products are warranted against defects in materials and workmanship for two years after purchase. Opticon will repair or, at its option, replace products that are defective in materials or workmanship with proper use during the warranty period. Opticon is not liable for damages caused by modifications made by a customer. In such cases, standard repair charges will apply. If a product is returned under warranty and no defect is found, standard repair charges will apply. Opticon assumes no liability for any direct, indirect, consequential or incidental damages arising out of use or inability to use both the hardware and software, even if Opticon has been informed about the possibility of such damages.

Packaging

The packing materials are recyclable. We recommend that you save all packing material to use should you need to transport your scanner or send it for service. Damage caused by improper packaging during shipment is not covered by the warranty.

Trademarks

Trademarks used are the property of their respective owners.

Opticon Inc. and Opticon Sensors Europe B.V. are wholly owned subsidiaries of OPTOELECTRONICS Co., Ltd., 12-17, Tsukagoshi 4-chome, Warabi-shi, Saitama, Japan 335-0002. TEL +81-(0) 48-446-1183; FAX +81-(0) 48-446-1184

1. Abstract

This manual provides specifications for the MDC100A linear CCD scan engine with built-in decoder.

2. Overview

The MDC100A is a compact barcode scan engine that can be installed in various handheld products such as a portable device. The use of short wavelength red LED illumination enhances the visibility when aiming at a barcode. The MDC100A has a built-in decoder that enables this scan engine to decode the bar codes after scanning and output the information via its serial communication interface. The MDC100A is RoHS compliant.

Features

- MDC100A's high definition glass imaging system ensures steady performance in various conditions.
- Glass-fiber reinforced polycarbonate body is very strong to mechanical shocks which extend the applications from general in-house environment to hard field applications.
- 50 degree scan angle is larger than any laser scan engine in equivalent class, best to read high capacity barcodes in space-limited applications.
- MDC100A's patented adaptive illumination technology allows it to automatically read barcodes either on paper or on LCD screens such as mobile phone / tablet / and PC monitor, while keeping the power consumption very low.
- MDC100A features both RS-232C and USB interfaces.

3. Physical Features

3.1. Dimensions

22.8 × 15.0 × 11.5 (WDH mm)

3.2. Weight

3.3 g

4. Electrical Specifications

Absolute Maximum Ratings

Item	Symbol	Rated Value	Unit
Power Supply Voltage(Vcc to GND)	Vcc	3.9	V
Input Voltage	V1	-0.3 ~ Vcc +0.3	V

Electrical Characteristics VCC = 3.3 V、Ta = 25 °C

Item		Symbol	Conditions	Min	Typ	Max	Unit
Operating Voltage		V _{CC}		3.0	—	3.6	V
Operating Current		I _{OP}	READ State	—	110	120	mA
Idle Current		I _{IDL}	IDLE State	—	18	25	mA
Sleep Current		I _{SLP}	SLEEP State	-	100	-	uA
Peak Inrush Current		I _{PEEK}		—	150	200	mA
Input Voltage	High	V _{IH}		V _{CC} ×0.8	—	—	V
	Low	V _{IL}		—	—	V _{CC} ×0.2	V
Output Voltage	High	V _{OH}	I _{OH} =-1mA	V _{CC} —0.5	—	—	V
	Low	V _{OL}	I _{OL} =1.0mA	—	—	0.5	V
Input Current		I _{IN}	V _{IN} =V _{CC} V _{IN} =0V	—	—	1.0	uA

Timing Specification

Item	Symbol	Conditions	Min	Typ	Max	Unit
Start-up Time	ST _T	—	80	—	—	ms
Trigger ON Time	TO _T	—	20	—	—	ms

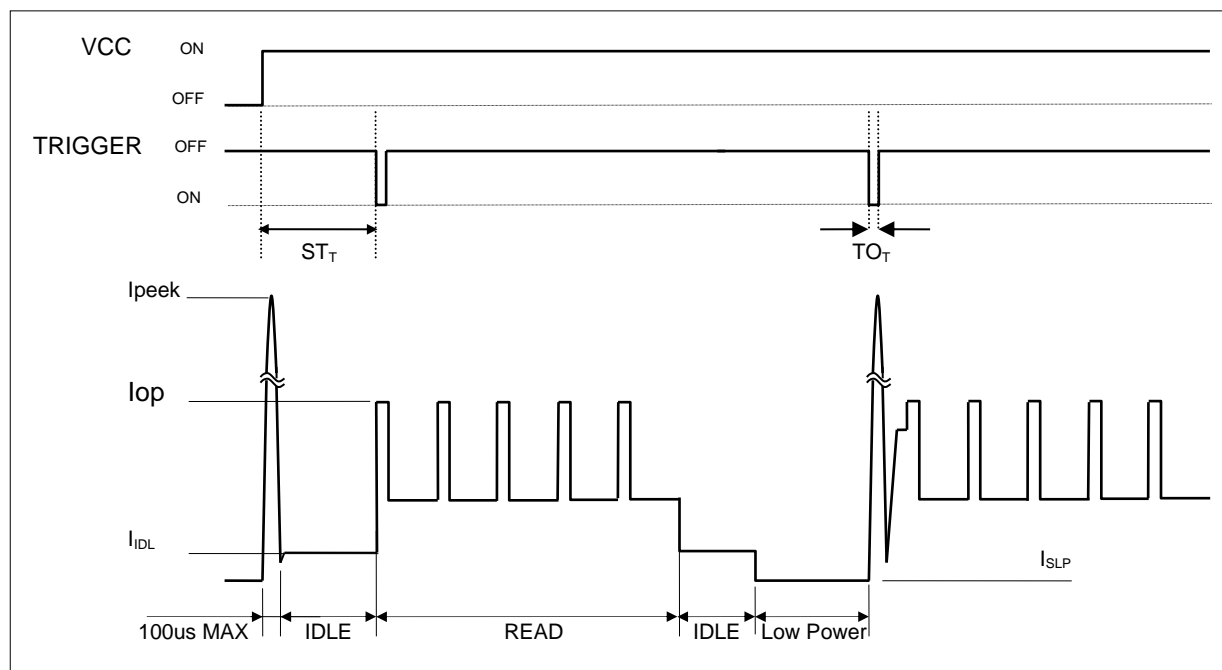

Figure 1: Current Waveform

5. Power Mode Transition

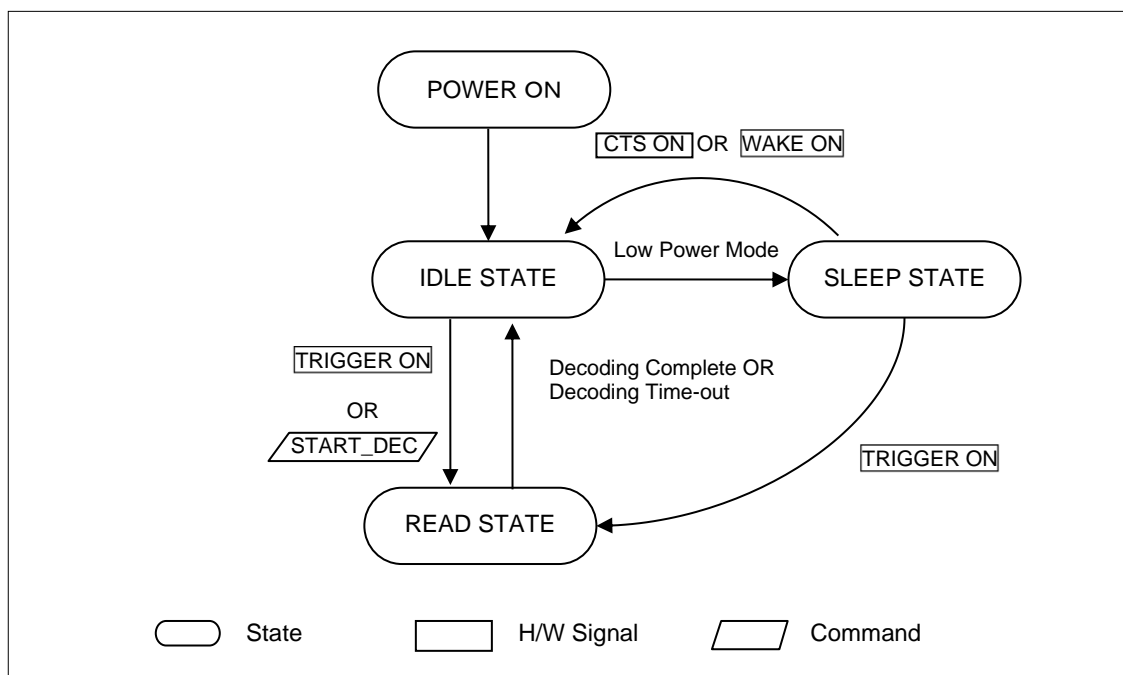

Figure 2: Power Mode Transition

* Low Power mode is ONLY available when using RS-232C interface.

- When “Low Power” mode is enabled, the MDC100A automatically enters “SLEEP” state from “Power-ON”.
- When moving to “IDLE” state by “CTS ON” or “WAKE ON” from “SLEEP” state, MDC100A goes back to “SLEEP” state in two seconds if no event occurs to move to other states.

Universal ID	Description	Default
Z5	Disable Low Power mode	Y
Z6	Enable Low Power mode	

6. Interface Specifications

Connector used: IRISO Electronics Co.,LTD."IMSA-9681S-12",
12-pin, 0.5 mm pitch, FFC connector, bottom contact type (gold-plated)

Signal	Pin No.	I/O	Functions
Trigger	1	I	Trigger input, CMOS logic level: Low = Trigger
Wake	2	I	Wakeup input, CMOS logic level: Low = Wake
Decode LED	3	O	LED output, CMOS logic level: Low = LED On
Buzzer	4	O	Buzzer control pulse output, CMOS logic level: Low = Buzzer On
Power Down	5	O	Power down output, CMOS logic level: High = Low Power state
RTS	6	O	Request to send, CMOS logic level
CTS/USB+	7	I/O	Clear to send, CMOS logic level / USB + data signal
Txd	8	O	Serial data output, CMOS logic level
Rxd/USB-	9	I/O	Serial data input, CMOS logic level / USB- data signal
GND	10	—	Ground
VDD	11	I	Power supply: DC 3.0V ~ 3.6V
Boot	12	I	Start signal input, CMOS logic level : High = normal operation

7. Optical Specifications

7.1. General Factors

Item		Characteristics		Unit
Illumination		Amber LED		—
Peak wavelength		624		nm
Scan rate		300 Maximum		scans
FOV	Horizontal	50		deg
	Vertical	±0.25	TYP	deg
		±(1.3 ~ 1.8)	MAX	

7.2. Optical Clear Zone for Decoding

Figure 3: Optical Clear Zone for Decoding

- 1: Illumination line except the dead zone (out of the FOV of imaging lens) is defined as optical clear path, where the MDC100A is able to decode.
- 2: Illumination edge is defined by 90% peak luminance of illumination line.

7.3. Recommended Installation Condition of Exit Window

Figure 4: Recommended Installation Condition of Exit Window

To avoid direct reflection from the illumination LED by the exit window, the following precautions are recommended:

1. The exit window should be parallel to the tip surface of the imaging lens with a 1 mm distance.
2. The thickness of the exit window should be less than 1 mm.
3. The material of the exit window should be transparent colorless PMMA. The plate should have optical flatness and optical anti-reflective coating on both surfaces.

7.4. Optical Clear Area of Exit Window

Figure 5: Optical Clear Area of Exit Window

From front view of the scan engine, the non-shaded area indicates the optical clear area. It is recommended to coat the shaded area matt-black. The dimension of the shaded area is based on the condition where the exit window is parallel located at 1 mm distance to the tip surface of the imaging lens and that there is a reasonable installation precision.

8. Technical Specifications

The conditions for technical specifications are as follows unless otherwise specified in each section.

<Conditions>

Temperature and humidity : Room temperature, room humidity

Ambient light : 500 lx

Background : White

Power supply voltage : 3.3 V

Test PCS : PCS 0.9

PCS = (Reflectance of white bar - Reflectance of black bar)
/ Reflectance of white bar

Reading test : Accept 2 successful reading within 2 consecutive attempts.
Each successful reading is in 0.5 seconds.

8.1. Depth of Field

*The decoding range is from the edge of the imaging lens.

<Conditions>

Resolution	Symbology	PCS	Quiet Zone	No. of Digits
1.0 mm	Code 39	0.9	20 mm	1
0.5 mm	Code 39	0.9	10 mm	4
0.33 mm	EAN-13	0.9	10 mm	13
0.25 mm	Code 39	0.9	5 mm	9
0.127 mm	Code 39	0.9	7 mm	4

Bar Code Sample : Optoelectronics Test Chart, N/W ratio = 1 : 2.5

Angle : $\alpha = 0^\circ$ $\beta = 15^\circ$ $\gamma = 0^\circ$

Curvature : $R = \infty$

8.2. Pitch, Skew and Tilt

Pitch	: $\alpha \leq \pm 50^\circ$
Skew	: $\beta \leq \pm 65^\circ$
Tilt	: $\gamma \leq \pm 25^\circ$

<Conditions>

Bar code	: Optoelectronics Test Sample
Distance	: 110 mm from the edge of the scan engine PCS 0.9, Resolution 0.33 mm, EAN-13, Quiet Zone 15 mm
Angle	: Pitch and Tilt angles calculated with Skew angle $\beta = +15^\circ$
Curvature	: $R = \infty$

Figure 6: Pitch, Skew and Tilt

8.3. Curvature

JAN-8	: $R \geq 15 \text{ mm}$
-------	--------------------------

<Conditions>

Bar code	: Optoelectronics Test Sample PCS 0.9, Resolution 0.26 mm, EAN-8, Quiet Zone 10 mm
Distance	: 110 mm from the edge of the scan engine
Angle	: Skew angle $\beta = +15^\circ$

Figure 7: Curvature

9. Environmental Specifications

9.1. Temperature

Operating temperature	: -20 ~ 60 °C
Storage temperature	: -40 ~ 70 °C

9.2. Humidity

Operating humidity	: 5 ~ 90% RH (no condensation, no frost)
Storage humidity	: 5 ~ 90% RH (no condensation, no frost)

9.3. Ambient Light Immunity

Decoding performance is guaranteed when the range of illumination on a bar code surface is between zero and the following values:

Incandescent light	: 4,000 lx
Fluorescent light	: 4,000 lx
Sunlight	: 100,000 lx

* Be sure that direct light or specular reflection from the light source does not enter the light receiving area of the scan engine.

9.4. Electrostatic Noise

There shall be no abnormalities in the output signals when sinusoidal electrical noise (50 Hz to 100 kHz, smaller than 0.1 Vpp) is added to the power supply line.

9.5. Vibration Strength

There shall be no sign of malfunction after the following vibration test.

Vibration test: Increase the frequency of the vibration from 12 Hz to 200 Hz at an accelerated velocity of 32.3 m/s² (3.3 G) for 10 minutes per cycle. Repeat this for 2 hours in X-direction, 2 hours in Y-direction and 4 hours in Z-direction.

9.6. Drop Impact Strength

There shall be no sign of malfunction after the following drop test.

Drop test: Fix the scan engine in a specific dummy case and drop it 10 times in total, at top, bottom, front, back, left, right, top-left, top-right, bottom-left and bottom-right faces, from a height of 180 cm onto a concrete floor.

10. Regulatory Compliance

LED Safety: IEC 62471-1:2006 Exempt_Group

11. RoHS

The MDC100A is compliant with RoHS.

RoHS: The restriction of the use of certain hazardous substances in electrical and electronic equipment, 2011/65/EU

12. Reliability

MTBF (Mean Time Between Failures) 100,000 hours

* It is calculated based on standard operation of the product within the recommended temperature range and without extreme electronic or mechanical shock.

13. Precautions

- All work-benches, tools, measuring instruments and any part of human body which have come into contact with MDC100A must undergo preliminary antistatic treatments.
- Do not touch the optical and electrical components. If the MDC100A needs to be picked up, hold it on the camera body.
- Avoid handling MDC100A in a dusty area. In case dust gets on MDC100A, gently blow it off with dry air. Direct contact of swabs and such on its optical part may cause deterioration of its performance.

14. Packaging Specifications

14.1. Packaging

Figure 8: Packaging 1

A : Barcode Serial Label for Packaging Box:
Stick the labels on both front and back side of the box.

B : Missing Serial Number Label:
Attach this label when there are more than 3 labels of which serial numbers are out of order (not in a correct sequence).
